

BIFLEX

Foam holder for fragile plants

ME + PE

The role of this foam tie is to connect a plant's stem or a shrub's trunk to the nearby stake. The Biflex tie has the advantage of being made of foam, which helps keep the plant upright without risking damage. Indeed, the foam will not harm the plant's elements.

Benefits

Metal wire + foam allowing you to attach plants to stakes without harming them. Easy to use.

Characteristics

Made of polyethylene + steel wire.
