

PLUVIO

Rain gauge

MADE IN FRANCE · UV RESIST · 100% Recyclable · PP

The amount of rain falling in your garden can significantly impact the growth of your plants. This rain gauge will help you manage your crops more easily as it indicates the height of water that has fallen over a period and also provides information about the amount of water that has fallen per square meter.

Benefits

To optimize irrigation and keep plants in optimal condition.
Analog device that measures the amount of water per m²: 1 millimeter of rain measured by the rain gauge is approximately equal to one liter of water per m².

Characteristics

An adapter is included to allow for the installation of a bar (bar not included).
Made of polypropylene.
Color: light green.
Made in Europe.
