

HIDECURVE Bicolor

Bicolor artificial hedge

Two-tone artificial hedge with 38 rods/ml, 50% recycled. It offers an aesthetic and practical solution for delimiting your garden or terrace. Create an effective visual barrier while adding a touch of greenery and nature to your outdoor space.

Benefits

Artificial hedge developed and manufactured by the Catral Group in our production plants. Thanks to the work carried out by our R&D department, we have created the first hedge with a realistic cut to imitate natural hedges as closely as possible. The result is a more realistic appearance and greater screening effect.

Characteristics

Material : PVC + green plastic-coated wire
Finish: Folded ends
Height : Real and exact height
Number of rods : 38 rods per metre
Weight : +/-1kg/m²
Colours : Light green - Dark green
Sheet thickness : +/- 60 microns
Recycled material : +/-50%
Form : Curve
Packaging : PP mesh
UV treatment : Yes
Patent pending
