

BATIBAG

Set of 10 waste bags of woven PE

100% Recyclable

PE

Nortene helps you even with your construction work. For example, if you have demolished a wall to expand a room, the Batibag debris bags can be very useful. Made from woven polyethylene, these bags are very durable. With a capacity of 140 liters, they can withstand loads of up to 40 kg.

Benefits

Allows for the transport of debris. Very durable thanks to its woven fabric, which is difficult to tear.
