

BARK BORDER

Bark Border is a polyethylene bordure with a brown colored smooth wood texture imitation

Semi-underground border to contain the development of a plant cover.

Benefits

To separate a flower bed from a lawn, for example, the border will make it possible to clearly delimit the two elements and to bring a touch of decoration to the heart of the garden. This flexible border is made from recycled material, its textured appearance imitating wood. Rot-proof and maintenance-free.

Characteristics

Material: 100% recycled polyethylene Length 10m x height 9cm Thickness 3.5mm 8 fixing pegs included UV resistant
