

AMARYS

Unique solar cell lamp stuck into the ground

To compose a welcoming lit path or give atmosphere to floral borders.

Benefits

The SMD LED technology radiates a beautiful luminous halo around the edge of the light. The light also extends along the transparent acrylic tube, down to the ground. The rounded shape solar panel integrates perfectly into the light giving it a very designer shape.

Characteristics

Dimensions 6 x 33 cm h. Acrylic and metal material. 1 SMD white LED. Polycrystal 2 V – 120mA solar panel. 1.2V - 600 mAh AAA Ni-MH rechargeable battery. On/off switch. Around 5 to 6 hours of operation at full charge.
