

TRELLIS ATHEA

Metal trellis, with decorative patterns

The metal Deco trellis can either be planted in the ground or be fixed to a wall. Depending on what you choose, it can then delimit a space or accompany the growth of climbing plants along a wall for example. The different shapes composing this decorative panel are very aesthetic.

Benefits

To be used as a trellis or to delimit outdoor spaces. Double use: to plant in the ground, or to fix on a wall. To create an atmosphere in the garden, on the terrace.

Characteristics

Metal sheet (thickness 0.6 mm) welded in a rectangular frame (thickness 10 mm). Perforated patterns, made by laser cutting. Installation kits supplied, for wall or soft ground installation. Dimensions: L. 600 x l. 10 x H. 1500 mm.
