

MOON

Decorative trellis

Now you can install your fencing in a personalized way with this new concept of square decorative trellis. Do you dare to play with colors and shapes and create a customized fence in your garden?

Benefits

Perforated by small circles accompanied by a progressive reduction of diameters, the Moon decorative trellis protects you from prying eyes, the wind, the sun... while creating original effects of light and shadows that appear randomly. The 1x1m dimensions allow different types of installation: by changing its orientation we can customize the fencing to our liking. It can be installed vertically (one above the other) or horizontally to close your terrace, put on a wall or create a private space in your garden. Mounted on the wall, this decorative trellis can also be used as a support for climbing plants or as a decoration. The injected polypropylene resin allows to have a light, robust and durable product for years.

Characteristics

Made of injected PP resin. Weight: 3.44 kgs. Thickness: 5mm Available in different colors: white and rust or anthracite color with metallic effects. It can be easily cut in any direction. With anti UV treatment. The panels can undergo a slight expansion or contraction with changes in temperature, so it is important to follow the assembly instructions (see video) to maintain the correct distances.
