

DECORATION PANEL

Metal panels with decorative motives

The metal Decoration Panel can either be planted in the ground or fixed to a wall. Depending on the choice you make, it can then delineate an area or accompany the growth of climbing plants along a wall for example. The various forms comprising this decorative panel are very attractive.

Benefits

Can be used as a trellis or to divide outdoor spaces. Dual use: to plant in the ground, or to secure to a wall. To create an atmosphere in the garden, on the patio. New decorative panel metal model, with openwork patterns, in the spirit of Moroccan moucharabys.

Characteristics

Welded metal sheet in a rectangular frame. Openwork patterns, made by laser cutting. Installation kits provided, for installation on a wall or in soft ground. New design and new colour: brown aged effect. Panel Height : h 1500mm Feed Height (for ground installing) : h 300mm Feed diameter : Tube Ø10mm
