

CLIMATEX

Growing fleece

MADE IN FRANCE · 17 g/m² · UV RESIST · 100% Recyclable · PP

Here's a simple and effective solution for helping seedlings grow in you kitchen garden: The Climatex cover. Secure to the ground to stop it blowing away. This type of cover is most suitable for the spring and the autumn.

Benefits

Raises the temperature of the soil. Accelerates sprouting. Protects from late frosts. Creates a micro-climate, encouraging seedlings to grow. It is lightweight and can be raised above the plants so it does not hamper growth. Increases yields. For a successful early potato crop !

Characteristics

Non-woven, air and water permeable cover in 17 g/m² polypropylene. UV resistant, can be used for several years. Available in a range of sizes For use in the spring and the autumn Made in France
