

# BALCONY 4

## Balcony greenhouse

40µ UV RESIST PVC

Don't you have much space on your balcony or terrace but you want to protect your plants from the cold during the winter? This greenhouse is the solution since its measurements allow it to be placed in any space.

### Benefits

An accessible and space-saving greenhouse thanks to its reduced depth to 30cm. Mini balcony greenhouse for plant protection or seedling start-up. A good solution for growing on balconies, patios and terraces.

### Characteristics

Steel structure, green epoxy paint. 4 removable shelves. Transparent PVC cover with door equipped with double zip opening for easy access. Dimensions: height 1.58 m, width 70 cm, depth 30 cm. Anti-UV treated.
